

## Contents

|   |     |
|---|-----|
| Estimating Human Movements Using Memory of Errors<br>D. Dong, S. Franklin, P. Agrawal . . . . .   | 1   |
| Constructing Phenomenal Knowledge in an Unknown Noumenal Reality<br>O.L. Georgeon, F.J. Bernard, A. Cordier . . . . .   | 11  |
| Modeling Biological Agents Beyond the Reinforcement-learning Paradigm<br>O.L. Georgeon, R.C. Casado, L.A. Matignon . . . . .  | 17  |
| Development of a Self-evolving Conscious System<br>R. Matsushita, J. Takeno . . . . .   | 23  |
| Fly-The-Bee: A Game Imitating Concept Learning in Bees<br>D. Kleyko, E. Osipov, M. Björk, H. Toresson, A. Öberg . . . . .   | 25  |
| A Generic Software Platform for Brain-inspired Cognitive Computing<br>K. Takahashi, K. Itaya, M. Nakamura, M. Koizumi, N. Arakawa, M. Tomita, H. Yamakawa . . . . .   | 31  |
| The Thermal Grill Illusion: A Study Using a Consciousness System<br>H. Xu, K. Kanazawa, D. Matsumoto, J. Takeno . . . . .   | 38  |
| Pleasant and Unpleasant States in a Robot<br>H. Ebisawa, R. Matsushita, J. Takeno . . . . .   | 44  |
| Semiautonomous Control of Personal Mobility Based on Passenger's Collision Avoidance Judgment Timing<br>N. Watanabe, H. Yoshioka, K. Miyamoto, J. Imani . . . . .     | 50  |
| A Comparison among Cognitive Architectures: A Theoretical Analysis<br>D.F. Lucentini, R.R. Gudwin . . . . .   | 56  |
| Guidelines for Designing Artifacts for the Dual-process<br>M. Kitajima, M. Toyota . . . . .   | 62  |
| Comparison of Different Learning Algorithms for Pattern Recognition with Hopfield's Neural Network<br>T. Szandala . . . . .   | 68  |
| An Approach for the Binding Problem Based on Brain-oriented Autonomous Adaptation System with Object Handling Functions<br>Y. Kinouchi, K.J. Mackin . . . . .         | 76  |
| Model-based Behavioral Causality Analysis of Handball with Delayed Transfer Entropy<br>K. Itoda, N. Watanabe, Y. Takefuji . . . . .                                   | 85  |
| Integrating a Cognitive Framework for Knowledge Representation and Categorization in Diverse Cognitive Architectures<br>A. Lieto, D.P. Radicioni, V. Rho . . . . .    | 92  |
| A Remark on Biological Consciousness and Free Will<br>A.G. Fonda . . . . .  | 99  |
| Designing, Implementing and Enforcing a Coherent System of Laws, Ethics and Morals for Intelligent Machines (Including Humans)<br>M.R. Waser . . . . .                | 106 |
| Anthropomorphic Artificial Social Agent with Simulated Emotions and its Implementation<br>V. Kugurakova, M. Talanov, N. Manakhov, D. Ivanov . . . . .                 | 112 |
| Modeling of Stress/Interest State Controlling in Robot-Child Play Situation<br>T. Omori, K. Abe, T. Nagai . . . . .   | 119 |
| Image Coding and Pooling with a Bio-inspired Reaction-Diffusion Algorithm<br>A. Nomura . . . . .  | 125 |
| BICA and Sex Differences: We Need to Understand Potential Sex Differences when Developing Computational Models of Human Behavior<br>C.L. Dancy, F.E. Ritter . . . . . | 131 |
| A Parameter Estimation Method for Dynamic Computational Cognitive Models<br>D.J. Thilakaratne . . . . .   | 133 |
| Classification Based on Lingual Variables Using Expert Matrix Obtained with Genetic Algorithm<br>T. Szandala . . . . .  | 143 |
| Autonomous Object Modeling Based on Affordances in a Dynamic Environment<br>S.L. Gay, S. Hassas . . . . .   | 150 |
| A Computational Cognitive Model Integrating Different Emotion Regulation Strategies<br>A.H. Abro, A. Manzoor, S.A. Tabatabaei, J. Treur . . . . .                     | 157 |
| Unified Formalization of «Natural» Classification, «Natural» Concepts, and Consciousness as Integrated Information by Giulio Tononi<br>E. Vityaev . . . . .           | 169 |

|  |     |
|--|-----|
| Respective Advantages and Disadvantages of Model-based and Model-free Reinforcement Learning in a Robotics Neuro-inspired Cognitive Architecture |     |
| E. Renaudo, B. Girard, R. Chatila, M. Khamassi . . . . .   | 178 |
| Human Robot Interaction in the Absence of Visual and Aural Feedback: Exploring the Haptic Sense  |     |
| J. Penders, A. Ghosh . . . . .   | 185 |
| A Cognitive Neural Model of Executive Functions in Natural Language Processing   |     |
| B. Golosio, A. Cangelosi, O. Gamotina, G.L. Masala . . . . .   | 196 |
| Multi-Dimensional Memory Frames and Action Generation in the MHP/RT Cognitive Architecture   |     |
| M. Kitajima, M. Toyota . . . . .   | 202 |
| Peculiarities of Semantic Web-services Cloud Runtime   |     |
| V. Klimov . . . . .  | 208 |
| Modeling of Cognitive Evolution: Perspective Direction of Interdisciplinary Investigation  |     |
| V.G. Red'ko . . . . .  | 215 |
| Structural Analysis of Human Eye Movement Trajectory   |     |
| O. Mishulina, I. Sukonkin . . . . .  | 221 |
| Towards Reconstruction of Dynamic Connectomes in Resting State for Development of Classifier-Decoder of Mental States                            |     |
| V. Ushakov, A. Poyda, V. Zavyalova, D. Malakhov, B. Velichkovsky . . . . .   | 227 |
| Cognitive Processes in Preparation for Problem Solving   |     |
| A.V. Samsonovich, A. Kitsantas, E. O'Brien, K.A. De Jong . . . . .   | 235 |
| Model of Plan Formation by New Caledonian Crows  |     |
| V.G. Red'ko, V.A. Nepomnyashchikh . . . . .  | 248 |
| Toward a BICA-Model-Based Study of Cognition Using Brain Imaging Techniques  |     |
| V.L. Ushakov, A.V. Samsonovich . . . . .   | 254 |
| Empirical Measure of Learnability: A Tool for Semantic Map Validation  |     |
| A.V. Samsonovich . . . . .   | 265 |
